VISA2AU

VISUAL IDENTITY · INTERNSHIP · MELBOURNE · 2026

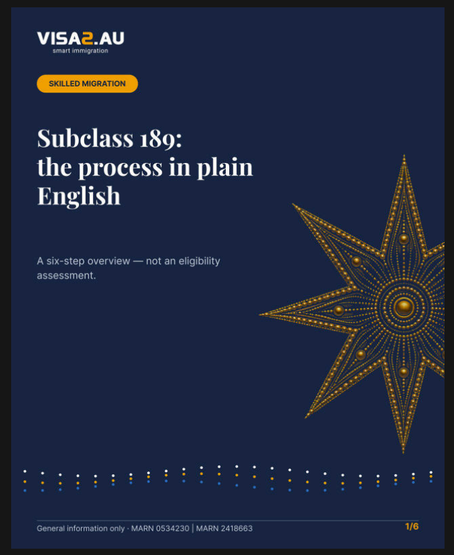

During my four-month internship in Melbourne, I designed the visual identity of Visa2AU, an immigration agency: the logo, a dotted pattern inspired by Australian wildlife, business cards for each office, the letterhead and the website.

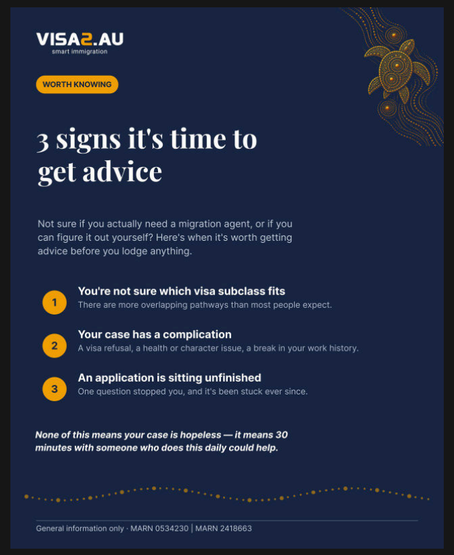

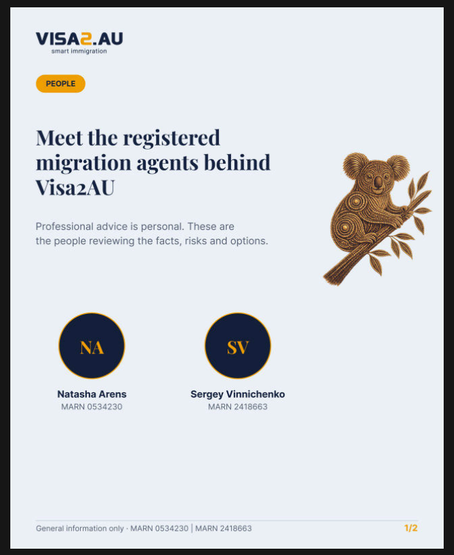

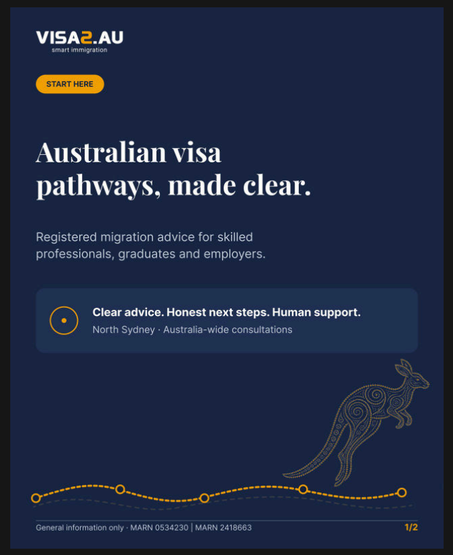

VISA2AU
LINKEDIN

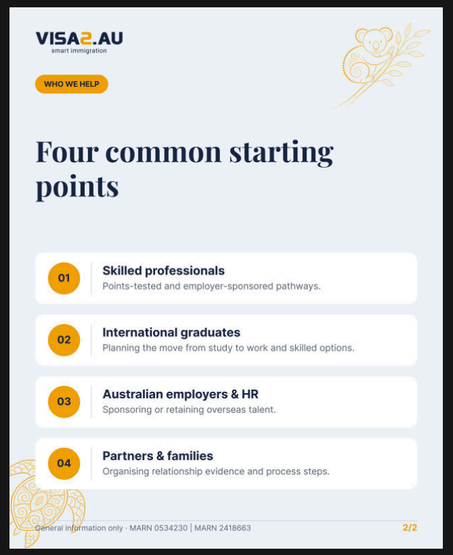

I also managed the agency's LinkedIn page. My carousels explain visa steps in plain English, using the same graphic system: navy, gold and line illustrations.

WEB ASSETS & SOCIAL MEDIA

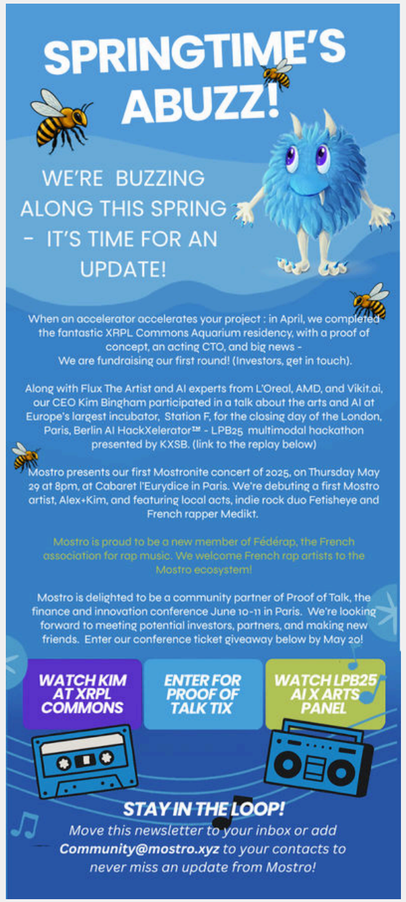

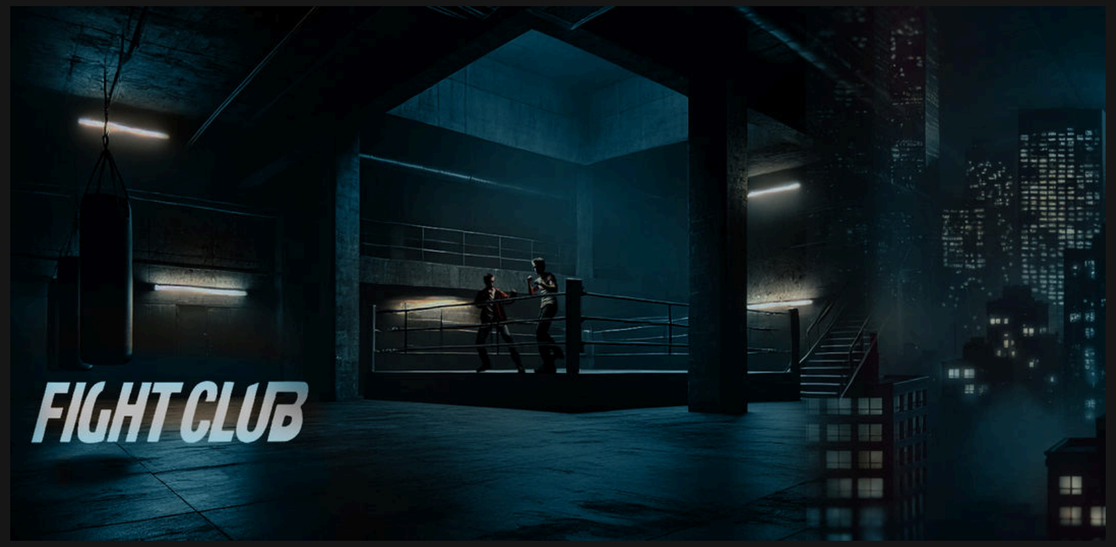

FILM POSTERS

In this project, I created posters for famous films without showing the main characters. I wanted to capture the essence of each story through color, light and atmosphere, letting the scene itself reveal the film's identity.

FAUST
& PUB 2A

Faust: an alternative cover for Goethe’s Faust, built in Photoshop from photographs, textures and classic typography.

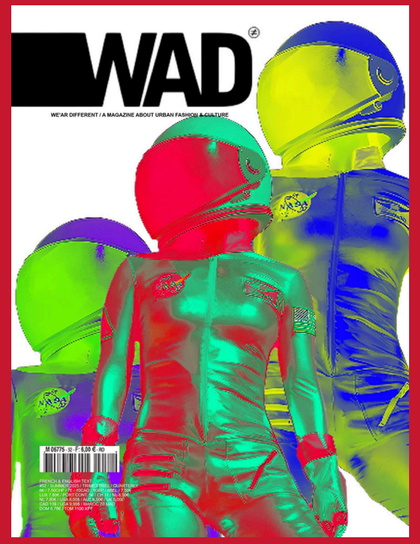

PUB 2A, 2025: a Dune-inspired visual world for our advertising class, with a personalized poster for each student.

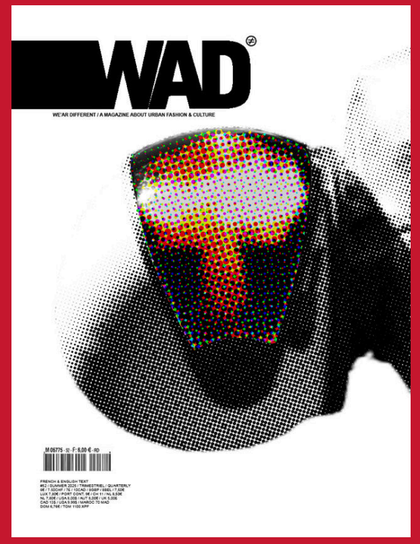

MAGAZINE COVER REDESIGN

For this project, I reinterpreted a WAD magazine cover. I kept the same photograph but was free to transform it in Photoshop: the crop, the composition and the visual treatment. I wanted to explore how a single image can tell different stories depending on how it is cropped, colored or placed on the page. Through this experiment, I discovered how design choices can completely reshape the identity and mood of a visual.

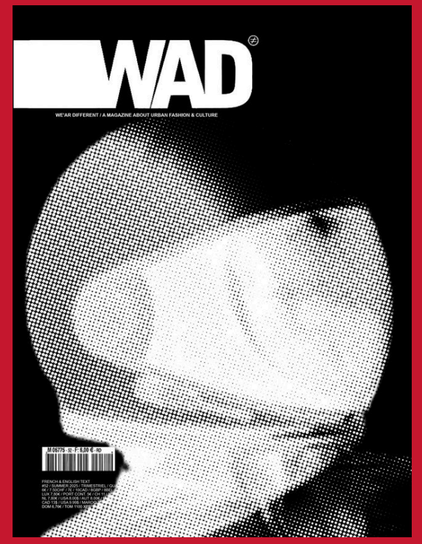

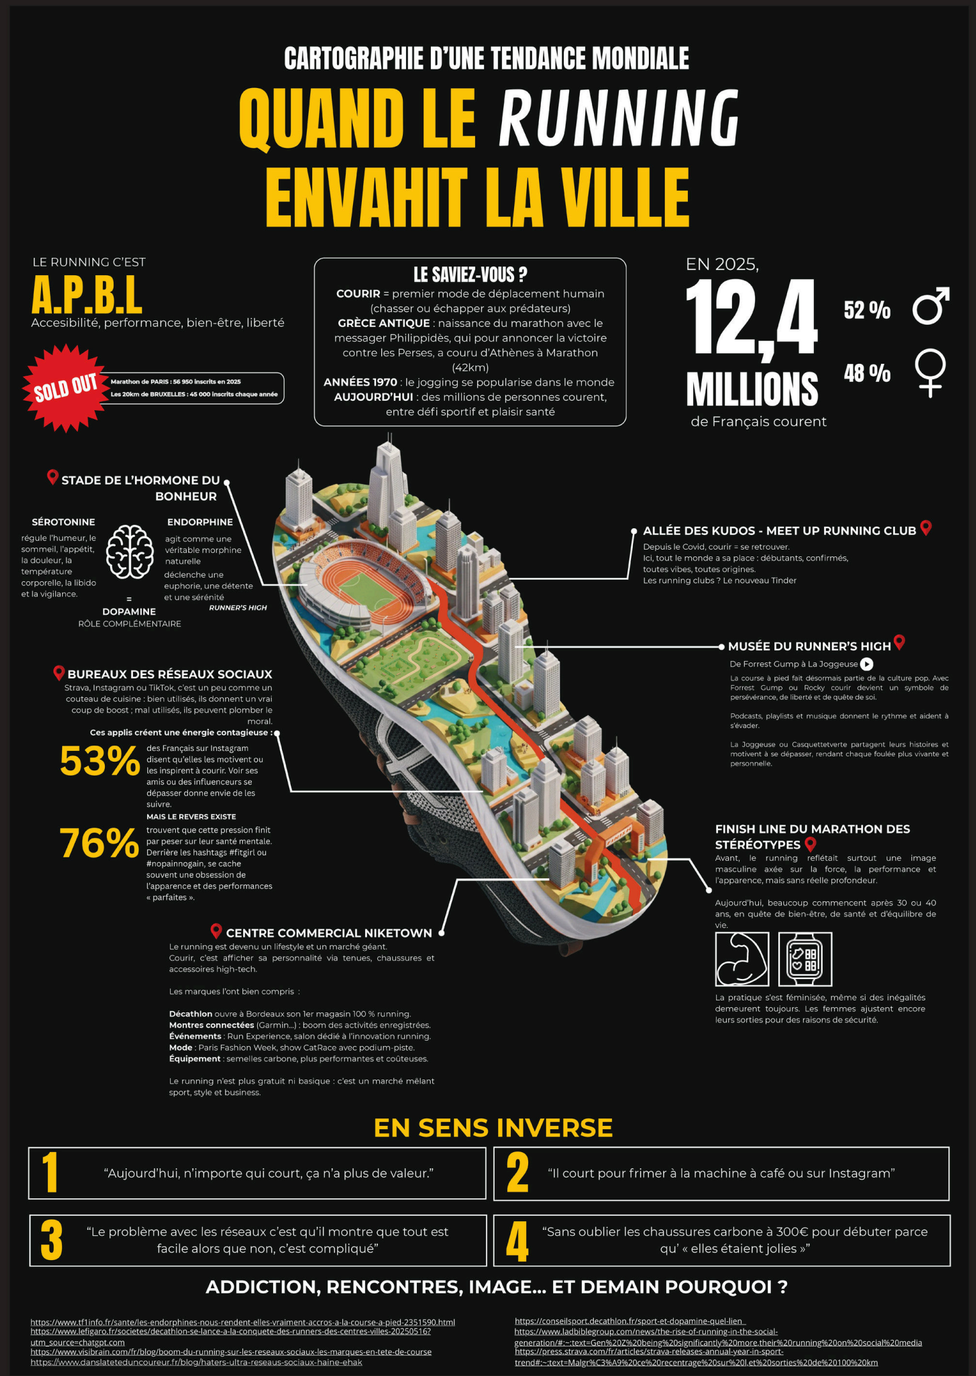

RUNNING POSTER

This poster was part of a group project about how running has taken over urban life. I created the 3D shoe at the center and added the orange trajectory to bring movement and energy to the composition. We wanted to show that running is no longer just a sport: it is a lifestyle, a connection and the rhythm of modern cities.

POSTER

CONFERENCE

IUT BORDEAUX · 2026

Team project for the conference “Brands vs Consumers: who will hold the power?”. My part: the chessboard and the background, where logos and consumers face off as chess pieces.

WHO AM I?

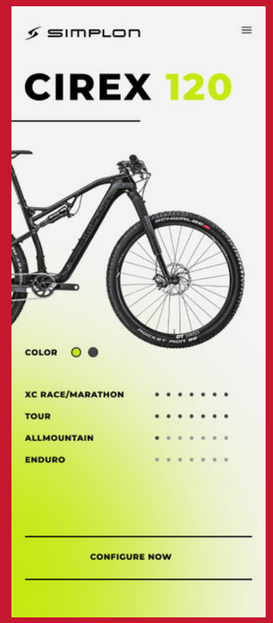

SCREEN PRINT

A two-color screen print in red and blue: a collage of portraits and type around the question “Who am I?”, written in Russian.

UI DESIGN

Two interfaces I designed in Figma. The first is my redesign of the Simplon bicycle website. The second is a personal concept for an Audi Formula 1 page: my own vision of how the brand could translate its spirit of speed and precision into a digital format. I worked on contrast, light and typography.

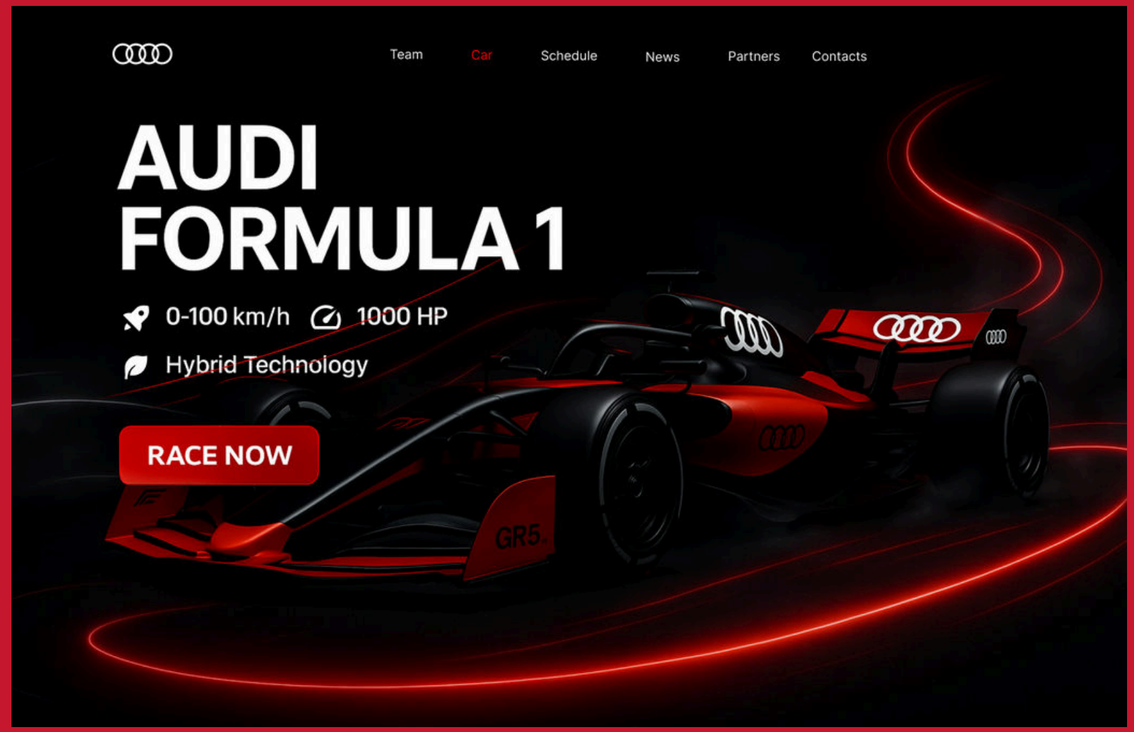

PHOTO GRAPHY

5H55

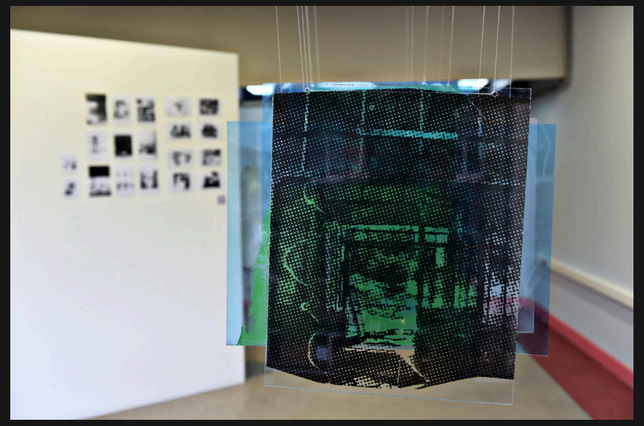

SHORT FILM · DIRECTOR OF PHOTOGRAPHY

A short film about an ordinary student day: a mirror, the corridor, a cigarette break, quiet moments of waiting. As director of photography, I worked with cold daylight and controlled close-ups.

WATCH THE FILM

TRANSLUCENT GARDEN

This installation, my final project for the Pre-Foundation Art & Design program (2020–2021), is inspired by the feeling of being inside a greenhouse, surrounded by transparency, color and light. Made of suspended blue and clear screen-printed plastics, it forms a fragile, shifting landscape, both artificial and alive.

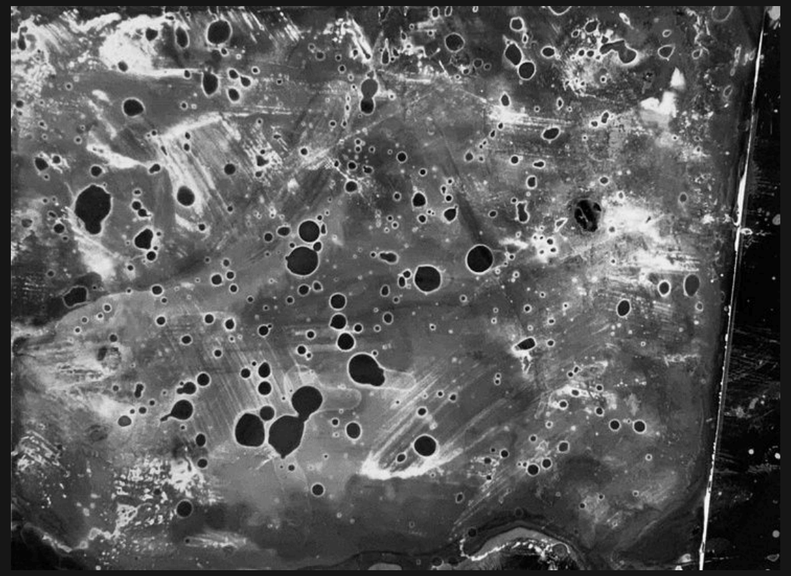

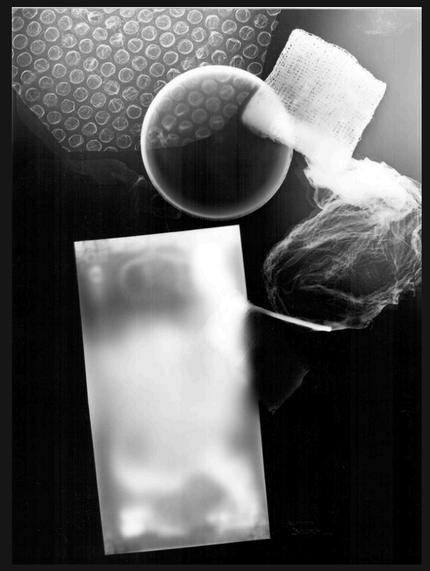

In this project, I explored the cyanotype technique, working with architectural details and sculptures. Each print became a small experiment, a way to discover how this old photographic process can turn something ordinary into something almost timeless.

PHOTOGRAPHY CYANOTYPE

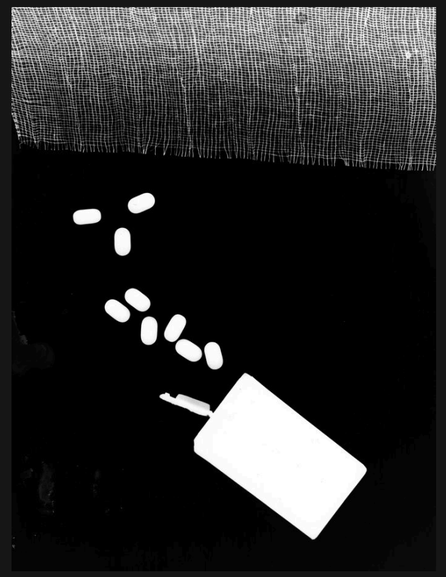

PHOTO GRAM SERIES

BARE EARTH

In these projects, I used 3ds Max to bring interior and architectural spaces to life. I wanted to create realistic, atmospheric images, exploring how light, texture and perspective can change the mood of a place.

3D VISUALIZATION
